

Crosshairs removal (By PiperCalls) (crosshairs are for wimps!)

It is recommended to first test that your crosshair is dead on in the games before removing the crosshairs. Make any minor adjustments before removing them. You'll need your aim dead-on accurate to play without crosshairs.

So, to remove the crosshairs from the game:

1. Copy the folders with the Crosshair removal textures into your User/Load/Textures/ folder. Leave the textures in their individual game folders.
2. In Dolphin, click on Graphics, click on the Advanced Tab & under the Utility field select Load Custom Textures box.

The Crosshairs are completely removed in most of the games, there are a few games that I haven't been able to track down all the Crosshair textures. Once I get these tracked down I'll include them in the Pack #2. If anyone wants to help track these down, please share. Some of the non-Rail games I've just left the crosshairs as these are just an early preview of Pack #2.

Here are the games "patches" i've included with this pack (total of 45 games) along with some notes as needed. Buttons are mapped what worked for me, feel free to change button assignments.

Arcade Shooting Gallery

Attack of the Movies 3D

Big Buck Hunter Pro

Cabela's Monster Buck Hunter

Chicken Blaster

Chicken Riot

Chicken Shoot - this game has issues, you have to use dpad up to move your aim up and even with crosshair on and directly lined up with the target it still doesn't register hits all the time.

Cocoto Magic Circus

The Conduit - non Rail type, will def require some more buttons setup, haven't removed the crosshairs yet

Conduit 2 - non Rail type, will def require some more buttons setup, haven't removed the crosshairs yet

Deer Drive Legends - aiming is very slow on this game, maybe some Dolphin settings to speed it up?

Dead Space Extraction - aim is on but going to need to setup more buttons to progress through the game

Dino Strike

Eco Shooter: Plant 530

Fast Draw Showdown - Hold DPAD Down to holster gun

Ghost Squad

Gunblade NY & LA Machineguns: Arcade Hits Pack - haven't been able to locate the crosshair texture to remove it yet
